

Pico Genie Screens

Portable, Folding Desktop screens

Lightweight & Portable

Free-standing Design

Carry Case with Should Strap or Handles

Key Features

Lightweight & Portable

Non-Crease, folding screen

Free-standing, tabletop design

Available in varying sizes

User Benefits

Weighing just over 1kg, these screens can be slipped into the handy carry bag (25" - 40" models only) or the durable casing and carried by the built-in handles (50" & 60" models).

Scissor action arms and hinges carefully roll the screen material into the protective metallic casing to keep your screen clean and crease free, time after time.

The mini legs support the free-standing screens on any level surface.

Available in 25", 32" 40", 50" & 60"

The lightweight, folding Pico Genie Portable Mini desktop screens are the perfect companion for your projector. The screens come with a durable metallic case and a canvas case (25"-40" models) or built-in handles.

Ranging from 25", 32", 40", 50" to 60" there is something to suit every need. The Pico Genie screens are simple to use with a one click open and shut lever.

The advantages of using a desktop projector screen like this include :

1. The ability to project onto non-white and non-textured walls
2. The ability to project exactly where you want to rather than in the smallest space you can find between photos on the wall
3. Improved image quality using a screen that's designed to work with LED & pocket projectors
4. Portability - If you think a screen is important then it's got to be portable, light, durable and easy to use

This projector screen easily slides open (to any height) and slides shut again for complete ease of transportation. You'll never need to worry about the suitability of surfaces for projection again, just conveniently take the perfect screen with you wherever you project.

British Branded

Pico Genie Screens

As seen on Channel 5's "The Gadget Show"
